Water treatment

It is strongly recommended on completion of the installation the system should be properly flushed and filled in accordance with the British Standard Code of Practice for the Treatment of Water in Domestic Hot Water Central Heating Systems BS7593

For maximum efficiency, radiators should be fixed at not less than 100mm from finished floor level. Pipe positioning guide for manual valve allow 35mm to centre pipe. For TRV allow 45mm to centre pipe. To prevent damage to radiator it is strongly recommended during installation to leave protective packaging on radiator by simply removing the lug protectors and pre-cut tapping connection

Notes

- All outputs at Delta T50°C
- Heat outputs certified to EN442
- All Eco Rads are supplied with factory fitted top grille and side panels
- Eco Rads are manufactured under EN ISO 9001
- Eco Rads are painted with RAL 9016
- All dimensions in millimetres
- All prices subject to VAT
- A restocking charge applies (see page 43)

Shaping & Return Policy

Radiator Shaping Service (Enfield only)

Description	Price
Single Radiator for Angled Bay	£100.00 per angle
Single Radiator for Curved Bay	£30.00 per foot
Brackets Altered for Vertical Fixing	£150.00 per radiator
Return of Template / Dispute	£40.00

Strict Conditions Apply

- Any queries relating to template will be charged
- Radiators are repainted with primer only and not radiator paint
- Curving can cause creasing to top and bottom sections
- Manufacturers warranty is negated once radiator is altered
- Your template is final! No alterations or cancellations accepted
- Delivery will be approx 15 - 20 working days
- Template must be marked either to wall or skirting
- Only radiators supplied by us will be sent for bending
- Templates will only be collected when we are delivering
- Top grills cannot be angled or curved
- Only single radiators can be shaped
- Only paper templates will be accepted

Please remember to put your name on the template, the size of radiator and whether to wall or skirting!
